

### Brighton College 13+ interview

Talk about you and your school, your interests out of school, and also some theoretical questions.

- 1) Family- What do your parents do?
- 2) Why did you choose Brighton College?
- 3) Did you choose any other schools just in case?
- 4) If you were offered a place by those schools and Brighton College, would you still choose us or one of them?
- 5) What are your favourite subjects?
- 6) What about your maths? What's your maths like? Is it going to be like something you think you will need a lot in the future? (Why do you think maths is an important subject?)
- 7) A math question (an exercise in distances): you are on the train journey, and you are going from the city of Edinburgh in the north to London, which is in the south of the UK. After a while, you look out of the window and you see a sign that says London 150 miles, then you travel to another 7 miles on the train towards London, you keep going, and when you look out of the window this time, you see a sign that says 250 miles back to Edinburgh where you came from.

With these three pieces of information, can you tell me the distances between Edinburgh and London?

- 8) Do you do any other sports?
- 9) If I were to put you in charge of Beijing for one day, you are the No1 administrator that is in charge of Beijing, and you can change one thing to make life better for everyone, what one thing would you change? And why?
- 10) If you can go anywhere you like on the planet, no restraints on Covid, you don't need to worry about money, you can take anyone with you that you like (eg. Friends / families / someone famous that you really want to spend time with), and you can do any activities that you like when you get to this place. Where would you go? Who would you take? And what would you do?
- 11) Any other questions that you would like to ask?
